- Approximate 100-Year Flood Boundary
- Cross Section Line
- Elevation Reference Mark
- River Mile

RM7 x
 • M1.5

NOTES TO USER

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Insurance Administration.

This map was prepared to support minimum flood plain management regulations; it may not show all areas subject to flooding in the community or all planimetric features outside special flood hazard areas.

Floodway widths in some areas may be too narrow to show to scale. Refer to Floodway Data Table where floodway width is shown at 1/20 inch.

For adjoining map panels, see separately printed Index To Map Panels.

ELEVATION REFERENCE MARKS

REFERENCE MARK	ELEVATION (FT. NGVD)	DESCRIPTION OF LOCATION
RM1	74.90	U.S. Coast and Geodetic Survey bronze disk, at Salinas Municipal Airport, at the rotating airway beacon, approximately 0.15 mile northwest of the control tower, 16.6 feet northwest of the north-west curb of Jeffery Avenue and in the west corner of the concrete base of the east leg.
RM8	59.05	U.S. Coast and Geodetic Survey disk 1.9 miles southeast along the Southern Pacific Railroad from the station at Salinas, at South Sanborn Road overpass 120.20, in the top of the northwest end of the concrete base of the second concrete pier northeast of the main track, 32.7 feet southeast of the south corner of a cyclone fence, 0.8 foot northwest of the northwest face of the pier, and approximately 2 feet lower than the track.
RM9	66.40	Temporary bench mark, a cut square on top of the concrete curb on the southeast return of the median island nose on Abbott Street at East Blanco Road. Established by George S. Notre & Associates.
RM10	64.45	Temporary bench mark, a cut square on the top of the concrete curb at the beginning of the curb at the most easterly return on East Blanco Road at La Mesa Way. Established by George S. Notre & Associates.
